

Procare Elite

Alternating pressure redistribution system With low air loss

Procare Elite is suitable for patients at high to very high risk of pressure ulcers. This system offers ventilated low air loss for maximum comfort. Its cell-on-cell bladder design prevents bottoming out, while the unique heel relief function ensures comprehensive care.

Additionally, the system features five distinct treatment modes to meet the diverse needs of patients.

Alternating Pressure Relief

Pressure mapping reveals that in alternating mode, bladder A & B take turns to inflate and deflate can significantly relieve the body pressure.

5 Modes to Fulfill Individual Needs

- Max Firm
- Alternating
- Continuous Low Pressure (CLP)
- Seat Inflation w/ Alternating
- Seat Inflation w/ CLP
