

Domus 3

Dual therapy mode pressure redistribution system

Domus 3 combines alternating and static therapy modes to improve pressure relief care and reduce caregiver workload. It includes a low-pressure alert for patient safety and a weight indicator dial for easy adjustment. Additionally, it effectively wicks away moisture from the surface to aid in microclimate management, leading to a more comfortable experience and better prevention of pressure injury without losing cell firmness.

In 2015, a clinical case study 1 involving 10 patients demonstrated that the Domus 3 system effectively improved moisture lesions in affected patients.

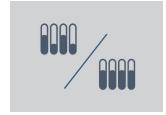

Microclimate Management Micro low air loss effectively wicks away moisture from the surface, leading to a more comfortable experience.

Infection
The top cover is made with welded seams(high frequency induction hardening ®) to avoid fluid ingression.

Decreases the Risks of

Dual Therapy ModeProvide Static mode for enhanced patient immersion, Alternate mode for allowing pressure redistribution.

Prioritize Patient Safety
Visual and audible signals
are used to provide
low-pressure alarms to alert
caregivers in case of failure.

Domus 3

Revolutionize comfort, simplify care in pressure injury prevention

Specifications	Domus 3	Domus 3				
Pump	Dimension	29 x 18.5 x 12.6 cm (11.4 x 7.3 x 5 in)				
	Weight	2.2 Kg (5 lb)				
Wellett	Case Material	Fire Retardant ABS				
	Supply voltage	100 - 240 V / 50 - 60 Hz				
	Therapy mode	Alternate / Static				
	Noise Level	<35dB				
Mattress	Dimension	Cells	Length	Width	Height	
		17-20	190-210cm	85-90cm	10.2-20.3cm	
			(74.8-82.7 in)	(33.5-35.4 in)	(4-8 in)	
40	Туре	4" or 5" / Overlay ; 5" + 3"foam or 8" / Replacement				
	Weight	3.1 - 6.9 kg (6.8 - 15.2 lb)				
	Top cover material	Nylon/PU, Poly/PU				
	Cell material	Nylon / TPU				
	Maximum patient weight	140 - 200 kg (308 - 440 lb)			in 6±
